

# Conditional Statements

`elseif`  
Statement

# elseif Statement

**The elseif statement in PHP is used in conjunction with an if statement to add additional conditions to be evaluated if the initial if condition is false. It allows you to check multiple conditions sequentially.**

# elseif Statement

## Syntax:

```
if (condition1) {  
    // Code to be executed if condition1 is true  
}  
elseif (condition2) {  
    // Code to be executed if condition1 is false and  
    condition2 is true  
}  
else{  
    // Code to be executed if condition1 and condition2  
    are false  
}
```

# elseif Statement

## Syntax:

```
if (condition1) {  
    // Code to be executed if condition1 is true  
}  
elseif (condition2) {  
    // Code to be executed if condition1 is false and  
    condition2 is true  
}  
elseif (condition3) {  
    // Code to be executed if condition1 and  
    condition2 are false and condition3 is true  
}
```
