

Regular Expression

Section Intro

Regular Expression

A regular expression in PHP is a powerful tool for pattern matching and manipulation of strings. It is a sequence of characters that defines a search pattern.

Very IMPORTANT**

Regular Expression

Almost all programming languages

It can be called as

1. **Regex**
2. **Regexp**
3. **Regular Expression**

PHP functions to work with Regex

1. **preg_match:** Performs a pattern match on a string.
2. **preg_match_all:** Finds all matches of a pattern in a string.
