

Syntax: Exception Handling

```
try {  
    if(condition){  
  
    } else {  
  
    }  
} catch( ) {  
  
  
}
```

Syntax:

```
try {  
  
  
} catch( ) {  
  
  
}
```

```
try {  
    if(condition){  
  
    } else {  
        throw new Exception("Message goes here");  
    }  
} catch( ) {  
  
  
}
```

```
try {  
    if(condition){  
  
    } else {  
        throw new Exception("Message goes here");  
    }  
} catch( Exception $e ) {  
  
  
}
```

```
try {  
    if(condition){  
  
    } else {  
        throw new Exception("Message goes here");  
    }  
} catch( Exception $e ) {  
    echo $e->getMessage();  
}
```

```
$e->getMessage();
```

```
$e->getLine();
```

```
$e->getCode();
```

```
$e->getFile();
```
